ESTABLISHED 1751

NEW

A SHOTGUN FOR EVERY PREFERENCE. IDEALLY, ALL THREE.

The previously only semi-automatic shotgun from J.P. SAUER & SOHN – the SL5 Select – gets two new companions! With the XT and XT Optifade model versions, Sauer is adding two more semi-automatic shotguns to its range. All have one thing in common: the heart of the shotgun – the uncompromising and reliable Inertia breech. Each in its own: optimised for its area of application. Spoilt for choice.

SL5 SELECT

SL5 XT

SL5 XT OPTIFADE

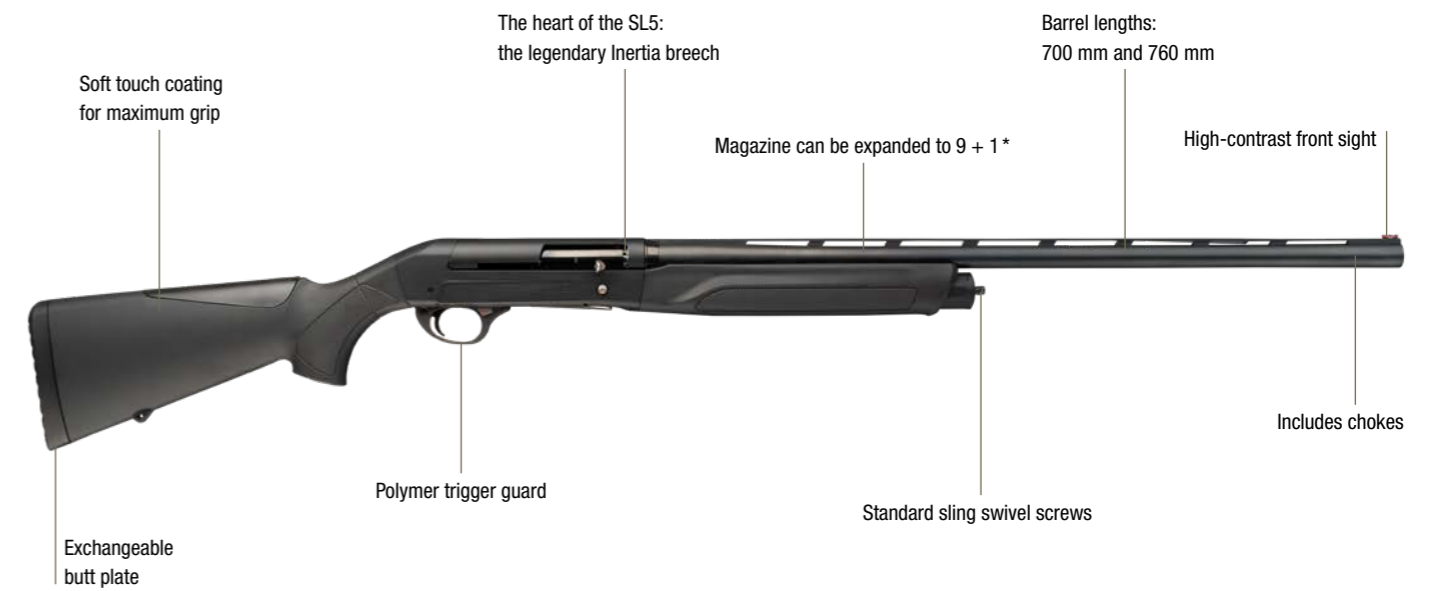

SAUER SL5 SELECT

The first semi-automatic shotgun from J.P. SAUER & SOHN is perfect proof that this type of rifle can be a true eye-catcher. But the quality is not only in the looks: From the butt plate to the muzzle, this model has all the technical top features that are the hallmark of a top-of-the-line shotgun.

SAUER SL5 XT

This model version combines the elegant look of the SL5 with robust usability. While the polymer stock is resistant to moisture and dirt, the soft touch coating ensures a reliable grip. This semi-automatic shotgun can withstand even the most adverse weather and yet is comfortable to handle. The perfect companion for daily hunting!

SAUER SL5 XT OPTIFADE

Optimised for hunting game birds like no other! The Optifade camouflage design lets the shotgun fade into the reeds and the blind. Controls such as the bolt release and the loading lever were made larger so they can still be operated easily and reliably even with gloves. The synthetic insert on the stock provides the best possible grip during rapid mounting. A highly functional workhorse for the toughest conditions!
